About This Game

Revised, rebalanced and expanded, Tipping Point is **Fate of the World** as it's meant to be played. Take control of the GEO through the five original missions, plus the “Cornucopia” and “Earth Day” update missions, and the “Denial”, “Migration” and “Extras Pack” DLCs.

Key features:

- Redesigned telemetry and UI including new Tech Tree interface
- More Cards, Impacts, and Achievements
- Includes 3 DLCs: “Denial”, “Migration” and our “Extras Pack” featuring the soundtrack and designer notes.
- New “Easy Mode” for scalable difficulty

Yes Is Good. Lol ik it free but this game actually sucks (cards game only). Definitely needs optimization, but also a very good game!. The reason I got this game was because I have no money...

I still don't.

But the game is difficult to control and the bots are either Your friend or a spy because sometimes they give the other team the ball and other times they are the only ones who can score...

4/10-Could be alot better

. Set skirmish with AI able to control my units.

Had a bit of a tussle with AI on where to plop down structures and what units to build.

Resign to concentrating on plopping down electricity structures instead.

Let AI do its job combating enemy AI.

Leave chair and enjoy the outdoor air for several hours.

Come back to see battle still raging with my forces on the brink of victory.

This is my kind of game.. Beautiful, emotional, sad Story. Very Human.

Wonderful artworks, and very very good mechanics. I enjoyed it with my xbox controller and controlling the flame while dodjeing attacks and hitting the right points. Hmm, super satsafying :)

Played it on hard on the first playtrouh, it was challenging but manageable.. This game is a waste of money. It was not fun or interesting to play. It is very simplistic and not well executed. I bought this on sale and still feel cheated.. As it stands at this point, I would not say this game is worth getting. First, there are only two resolution settings: 1280x720 and 1920x1080. While the gore and dismemberment system is solid and delivers well in terms of response, the combat system is very much a jankier version of what is already on offer in Mount and Blade. It makes use of directional attacks, but where Mount and Blade uses animations to let you know when your weapon has cooled down, and is responsive to mouse movement, this game gives you a loading circle to show when you can attack again, and requires large mouse movement for effective attacks. This sounds alright in theory, but is infuriatingly slow and counterintuitive in practice.

I appreciate it for what it attempts, but I feel that at this point, it is more of a proof of concept than a full on game, which leads me to ask why it was sold in the first place. I understand that it is a first attempt, and I do see glimmers of potential here. The dismemberment system is satisfying. But it cannot carry the whole game, nor should it.

Your money is better spent on Warband at this point in time.

If i try to play single , this error occurs.

This world allows the following packages: AoE2 (Expansions), The Qonquerors(Expansions), The African Kingdoms (Expansions)
890 : The Forgotten

why?

?????????. Just as the title suggests, LOOP is a very tranquil game. You can spend many hours solving the thousands of puzzles that await you. Listen to the lovely soundtrack and try to put the tiles in place to complete the beautiful patterns. In case of one of the generated levels being too hard, just skip it to avoid frustration.. This game will help you realize who you were before your grandmother was born.. Its fun at moments.... Fallout meets choiced based story telling Part 1. In my playthrough romance was not there at all. And the dark tone to this was good. Epilogue was really the only thing I had a problem with since certain things happened that I didn't get to actually experience.. WHAT THE ♥♥♥♥ WERE YOU ON WHILE CREATING THIS

GOLD STAR. it's an actual sport.
